

Lab 7

Questions:

- Q1** True
- Q2** False-increases by one MSS for every RTT
- Q3** True
- Q4** False-TCP resets its window size to one MSS
- Q5** A) Triple Duplicate Ack
- Q6** B) No
- Q7** D) Time out
- Q8** B) No
- Q9** B) Less
- Q10**

This “slow-start” period quickly discovers the maximum acceptable throughput that the path supports –otherwise, AI (additive increase) could take too long (each a full RTT)

- Q11** ?
- Q12** C) 400ms
- Q13** C) 1200ms
- Q14** B) 600ms
- Q15** Changing cross-traffic by other concurrent senders across the same routers.
